MEMORANDUM FOR: Deputy Director of Central Intelligence

SUBJECT : Significant Activities During the Period
1 June through Noon, 11 June 1971

1. The following activities of the Support Directorate which occurred during your recent trip may be of interest to you.

A. Excess Bureau of Public Roads Property

Based on a determination by the President's Property Review Board, the Federal Highway Administration on 20 May 1971 declared excess to its needs some 330 acres of land adjoining our Headquarters property. Although the Agency responded to a formal referral from the General Services Administration and requested assignment of a considerable portion of the excess land, we learned that the decision to make the entire excess area available for park land had, in effect, been made. The Director interposed by letter to the Administrator of General Services, with copies to Dr. Kissinger and to members of the President's Property Review Board. The Director followed up with a personal appeal to Dr. Kissinger, noting that the "excess" land included one of our principal parking areas and that, if the decision were implemented, we would be left without essential physical security buffering. Dr. Kissinger interceded with Mr. Arnold Weber, Chairman of the President's Property Review Board. We understand that no formal decision will be made without a further survey, which will include a review of Agency concerns and requirements. No date has been scheduled for this survey.
